

Privacy noise alone

Mechanism

 Gaussian $\left(\frac{\exp(\epsilon) - 1}{\epsilon} - \text{zCDP} \right)$

 Laplace (ϵ - DP)

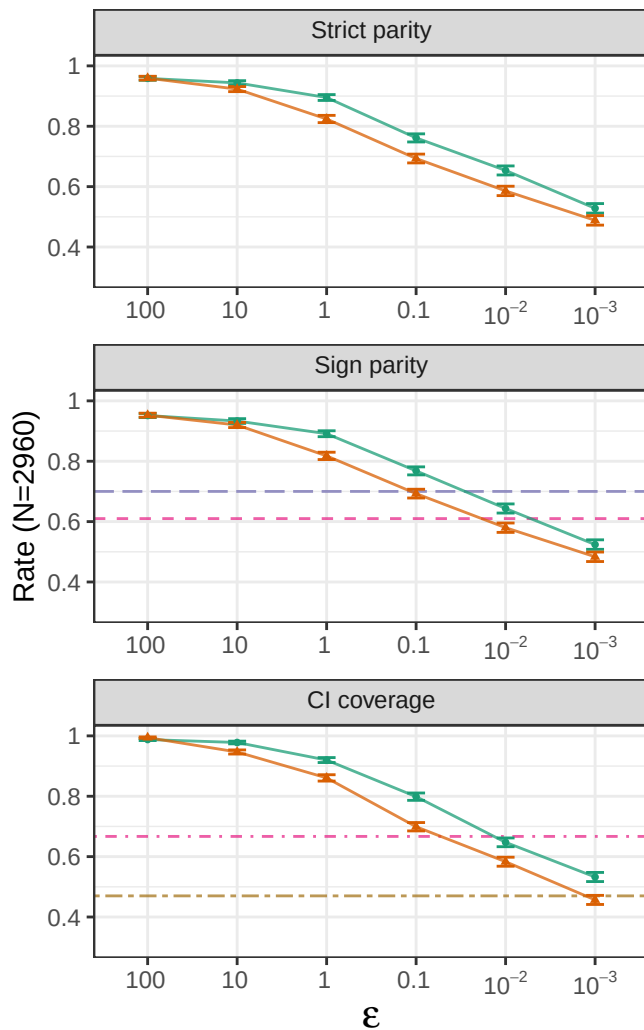

Privacy noise alone (data ind. bounds only)

Mechanism

 Gaussian $\left(\frac{\exp(\epsilon) - 1}{\epsilon} - \text{zCDP} \right)$

 Laplace (ϵ - DP)

Comparison
to typical
replication
rates (no DP)

 70% of robustness checks in 110 soc. sci. studies replicated effect direction (Brodeur et al., 2024)

 11 of 18 lab experiments in econ. replicated effect direction (Camerer et al., 2016)

 47 of 100 replicated CIs from social psych. contained orig. estimates (Open Science Collaboration, 2015)

 12 of 18 replicated CIs from econ. contained orig. estimates (Camerer et al., 2016)
