

The following files are contained herein are all in stata format and can be executed in one directory labeled “c:\aej”

estdata.dta	Final data to generate output for tables and figures in the print version, as well as online appendix
results.do	Final programs to generate output for tables and figures in the print version, as well as online appendix
accident*.dta person*.dta vehicle*.dta shell.dat	Original Fatal Accident Reporting System (FARS) data are in three levels by year (accident, person, and vehicle). These can be aggregated to the state level, coded as appropriate for estimation in the paper, and combined with control variable data to generate estdata.dta.
createdata.do	Creates the final data set estdata.dta by aggregating and adding control variable information. All control variable data are included within createdata.do
