

Anderson, Francois, and Kotwal, "Clientelism in Indian Villages" (#AER-2013-0623)

All files are in Stata 12.0 format.

Data files are *.dta and program files are *.do.

Details of data variables are in the paper.

List of do-files as well as associated data files:

1. aer-table2.do:

This file runs regressions for Table 2 and the corresponding robustness checks in Tables B1, B3, and B5.

Data files used are gp-aer.dta, programs-vill-aer.dta, census-aer.dta, and programs-aer.dta.

2. aer-table3.do:

This file runs regressions for Table 3 and the corresponding robustness checks in Tables B2, B4, and B6.

Data file used is trust-aer.dta.

3. aer-table4.do:

This file runs regressions for Table 4 and the corresponding robustness checks in Tables B2, B4, and B6.

Data files used are wages-aer.dta, cultivators-aer.dta, trader-aer.dta, outtrader-aer.dta, lender-aer.dta, terms-aer.dta, and interest-aer.dta.

4. aer-table5.do:

This file runs regressions for Table 5 and the corresponding robustness checks in Tables B2, B4, and B6.

Data files used are trust-aer.dta, programs-aer.dta, water-aer.dta, target-aer.dta, and festivals-aer.dta.
