

Data and Code ReadMe for “Effects of Immigrant Legalization on Crime”

Scott R. Baker

File 1: 1. Creates Results Table.do

This file is a Stata .do file. It loads the results_data.dta file and runs all regressions that are displayed in Table 1. It also compiles Table 1 in a Latex readable format.

File 2: 2. Calibration Data and Graph.xls

This file is a Microsoft Excel file. It contains results data from a calibrated model of crime and the labor market. Highlighted rows are utilized to form the tables on the two additional tabs in the file.

File 3: results_data.dta

This file is a Stata data file. It contains all of the immigration and crime (and associated covariates) necessary to compile the results featured in the manuscript. Immigration data can be obtained from the Legalization Summary Tapes from the US Commerce Department. Crime data assembled from the FBI’s Uniform Crime Reports (1980-2000). Data is compiled by county-year. Variables are
