

Description of data and codes replicating the results in the article:
Fernanda Brollo, Tommaso Nannicini, Roberto Perotti, Guido Tabellini
“The Political Resource Curse” – *American Economic Review*

• **DATA DESCRIPTION**

The data files **AER_smallsample.dta** and **AER_largesample.dta** include all the variables used in the empirical analysis of this article (STATA format): in particular, the first dataset refers to the “Small Sample” analysis described in the paper, while the second dataset refers to the “Large Sample” analysis. Both datasets cover two municipal administration mandates (2001-2004 and 2005-2005) and contain information at the municipality level on the following variables:

- measures of corruption (source: audit reports from CGU, <http://www.cgu.gov.br/AreaAuditoriaFiscalizacao/ExecucaoProgramasGoverno/Sorteios/index.asp>, coded by the authors);
- timing of release of audit reports with respect to the timing of municipal elections (source: audit reports from CGU, <http://www.cgu.gov.br/AreaAuditoriaFiscalizacao/ExecucaoProgramasGoverno/Sorteios/index.asp>, coded by the authors);
- actual FPM transfers (source: Tesouro Nacional website, http://www3.tesouro.gov.br/estados_municipios/transferencias_constitucionais.asp);
- theoretical FPM transfers (calculated by the authors based on IBGE population estimates and TCU allocation rules);
- population estimates (source: IBGE website, <http://www.ibge.gov.br/english/>);
- normalized population (with respect to the FPM cutoffs);
- state indicator;
- region indicator;
- macro-region dummies;
- municipal characteristics (source: IBGE website, <http://www.ibge.gov.br/english/>);
- mayoral characteristics (source: TSE website, <http://www.tse.jus.br/>);
- pool of opponents' characteristics (source: TSE website, <http://www.tse.jus.br/>);
- Probability of re-election (source: TSE website, <http://www.tse.jus.br/>).

Please refer to the article for a description of the variables. Each variable in the datasets can be identified by appropriate labels in English.

The following files can be used to replicate the results.

- **HOW TO REPLICATE THE TABLES AND FIGURES IN THE ARTICLE**

Statistical software used: STATA.

To derive the tables and figures of the article run the following do files:

PRC_AER_Tab2.do

PRC_AER_Tab3.do

PRC_AER_Tab4.do

PRC_AER_Tab5.do

PRC_AER_Tab6.do

PRC_AER_Tab7.do

PRC_AER_Tab8.do

PRC_AER_Tab9.do

PRC_AER_Fig1.do

PRC_AER_Fig2.do

PRC_AER_Fig3.do
