

Instructions to replicate empirical results shown in Tables and Figures in the article “Capital Cities, Conflict, and Misgovernance” by Filipe R. Campante, Quoc-Anh Do, and Bernardo Guimaraes, published on the American Economic Journal: Applied Economics.

1. The data and programs are stored in STATA format (compatible with STATA version 14 and later).
2. The first .do file, titled “AEJApplied_ConflictRegressions.do”, produces tables and figures shown in section 3.A in the paper, including Tables 3, 4, 6, 7, and Figure 1. It uses the .dta files “bygid_confdata.dta”, “bygid_onsetdata.dta”, and “workingfile2_onset.dta” (the last is particularly large). It also produces some summary statistics related to the corresponding sample.
 - a. To run this file, you first need to make necessary adjustments to the path of the current folder at the beginning of the file.
3. The second .do file, titled “AEJApplied_CrossCountryRegressions.do”, produces tables and figures shown in section 3.B in the paper, including Tables 8, 9, 11, 12, and Figures 2, 3, 4, 5. It uses the .dta file “AEJApplied_CrossCountryData.dta”.
 - a. To run this file, you first need to make necessary adjustments to the path of the current folder at the beginning of the file.
4. The other tables in the paper simply show raw data. No program is needed.
