

ReadMe of data and programs for “Employment, Wages and Voter Turnout”

The files included in this .zip file will re-produce the Tables in the paper as well as those in the on-line Appendix.

One important issue to note here, as we do in the paper, is that we obtained the U.S. Congressional turnout data for 1992, 1996, and 2000 from a private company, Election Data Services, Inc. Under our contractual agreement, we cannot make these data publicly available. As such, the data contained in this zip file cannot exactly reproduce the Congressional results in Tables 1, 5, and 6.

Reproducing the results

Table 7 and On-Line Appendix Figure 1 can be reproduced by using the programs `table7_aej.do` and `online_appendix_figure1_aej.do`, respectively, along with the Stata dataset called `voting_paper_anes_extract.dta` which is included in this zip file. This Stata file contains the original ANES variable names for the variables which we use in this program. The original ANES Cumulative data file is available at

http://electionstudies.org/studypages/download/datacenter_all.htm

The remaining Tables and Figures can be reproduced by first using the program `prep_aej_public.do` along with the other Stata dataset contained in this zip file, `voting_paper_extract_public.dta`, in order to create the dataset `voting_paper_cleaned.dta`.

Then, each of the following programs can be run using the newly created dataset:

`table1_&_online_appendix_table1_aej.do`

`table2_aej.do`

`table3_aej.do`

`table4_aej.do`

`table5_aej.do`

`table6_aej.do`

`table7_aej.do`

`appendix_table1_aej.do`

`online_appendix_table2_aej.do`

`online_appendix_table3_aej.do`

`online_appendix_table4_aej.do`

The program `online_appendix_table3_aej.do` also makes use of two additional Stata datasets, `sea_county_fips_reis.dta` and `esr_county_fips_reis.dta`, which link the FIPS county codes to the codes for SEAs and ESRs, respectively.

The program `online_appendix_table4_aej.do` requires three additional Stata datasets in this zip file: `mobility1970.dta`, `mobility1980.dta`, and `mobility1990.dta` which contain county-level summary variables from Census summary files which are available from the National Historical Geographic Information System at nhgis.org.

The final two columns of Appendix Table 1 are computed with data found in County Business Patterns 1967, U.S. Summary, CBP-67-1 published by the Bureau of the Census.

Definitions of variables in `voting_paper_extract_public.dta`

`fips` - five digit state+county fips code (first 2 state, last three county)

NOTE: fips codes are same as in Regional Economic Information System (REIS) coding. There, they merge together some counties - most notably in Virginia where many independent cities are merged with neighboring counties.

`year` - calendar year

`earn` - REIS variable - total earnings

`emp` - REIS variable - total employment

`pop` - REIS variable - total population

`nadults` - Census variable - # age 20+

`numblack_adults` - Census variable - # of blacks age 20+

`numothrace_adults` - Census variable - # of other race age 20+

`numfemale_adults` - Census variable - # of women age 20+

`num20s` - Census variable - # ages 20-29

`num30s` - Census variable - # ages 30-39

`num40s` - Census variable - # ages 40-49

`num50s` - Census variable - # ages 50-59

`num60s` - Census variable - # ages 60-69

`num7080s` - Census variable - # ages 70+

`congr_total` - total votes in Congressional race(s) (sum all races)

`gov_total` - total votes in Gubernatorial race

`senate_total` - total votes in Senatorial race

`pres_total` - total votes in Presidential race

`state_house_total` - total votes in State House race

`last_gov_year` - last year in which state held a Gubernatorial election

`last_senate_year` - last year in which state held a Senate election

for the senate seat up for election this year (usual cycle is six years apart)

`ognumest` - CBP variable - oil and gas number of establishments (in March)

`ognumemp` - CBP variable - oil and gas number of employees (in March)

`ogannwag` - CBP variable - oil and gas annual wage payments

`ogq1wag` - CBP variable - oil and gas first quarter wage payments

Oil and Gas establishment size categories for county in 1974 County Business Patterns (CBP)

ogestsz1974_1 - CBP variable - # of oil and gas establishments with 1-4 employees
