

Overview of Programs and Data to Replicate Results in “Housing Vouchers and the Price of Rental Housing”

by Michael D Eriksen and Amanda Ross

This short readme file describes the data and code used in the paper. The file titled "AEJEP_Regression_Program_6-24-14.do" is a Stata .do file that replicates Tables 1 through 8 and Figures 4 and 5 in the paper. That program reads in the intermediate data file titled "AEJEP_Regression_Data_6-24-14.dta" created from raw data provided by the US Census Bureau, US Federal Register, and US Department of Housing and Urban Development. You will need to update the path at the top of the regression to where the data are located in your machine to run the program.

Additional details about the source of the data and how each variable were constructed are documented in the paper and the regressions. The file titled “AEJEP_Results_6-24-14.log” is a STATA generated log file of the results in the paper.

Please do not hesitate to contact either one of us if we could be of assistance in replicating the results.
