

The Causal Effect of Economic Freedom on Female Employment & Education

Robin Grier [Texas Tech University, robin.grier@ttu.edu]

September 23, 2024

=====

This file lists all files and computing environment dependencies necessary to verify the results from this manuscript. It also explains the variables used in the analysis of the paper.

DATA

The data is required to reproduce the main results in the paper is called “Replication_Data.dta”

DO

To reproduce all tables, use the code in “Gender_Replication.do

****NOTE THAT ANY USER OF THESE MATERIALS NEEDS TO ADD THEIR RELEVANT GLOBAL FILE PATH / DIRECTORY TO ALLOW THE PROGRAMS TO WORK AS INTENDED****

VARIABLES

Labor_Force_Percent	the percentage of the total labor force that is female (called <i>Labor Force % Female</i>). <i>Source:</i> World Bank’s Gender Data Portal (2022b).
Labor_Force_Part	the percentage of females aged 15-24 that are in the labor force (called <i>Economically Active Females</i>). <i>Source:</i> World Bank’s Gender Data Portal (2022b).
Labor_Force_Part_all	the percentage of females aged 15 and older that are in the labor force. <i>Source:</i> World Bank’s Gender Data Portal (2022b).
Primary_Complete	the percent of females (of the relevant age group) that finished primary education (called <i>Primary Schooling</i>). <i>Source:</i> World Bank’s Gender Data Portal (2022b).
pcy	Expenditure-side real GDP at chained PPPs (in mil. 2017US\$) divided by population (in millions). <i>Source:</i> Penn World Table (Feenstra et al., 2015)

hc	Human capital index, based on years of schooling and returns to education. <i>Source:</i> Penn World Table (Feenstra et al., 2015)
cash_x	Share of merchandise exports at current PPPs. <i>Source:</i> Penn World Table (Feenstra et al., 2015)
cash_g	Share of government consumption at current PPPs. <i>Source:</i> Penn World Table (Feenstra et al., 2015)
Inflation	Inflation, GDP deflator (annual %). <i>Source:</i> World Development Indicators (World Bank, 2022a).
EFW	A measure of the degree of economic freedom in countries around the world. <i>Source:</i> Fraser Institute (2021).
vdemoc	called <i>v2x_polyarchy</i> , it asks: “to what extent is the ideal of electoral democracy in its fullest sense achieved?” The values range from 0 to 1, with higher numbers representing more democracy. <i>Source:</i> Varieties of Democracy Dataset (Coppedge et al., 2021).

DEPENDENCIES/

This folder contains user-written functions used in the analysis. These should be manually added in a personal or plus ado directory.

psmatch2.ado - User-written function to implement propensity score and Mahalanobis matching, common support graphing, and covariate imbalance testing. *Source:* E. Leuven and B. Sianesi. (2003). PSMATCH2: Stata module to perform full Mahalanobis and propensity score matching, common support graphing, and covariate imbalance testing.
