

The Role of Local Officials in New Democracies: Evidence from Indonesia

Monica Martinez-Bravo

Data Files and Programs

July 4th, 2013

This directory contains the data files and programs to replicate all the tables and figures in the paper “The Role of Local Officials in New Democracies: Evidence from Indonesia”. The data files and programs are designed to work with Stata version 11.2 or later.

This folder contains two files LocalOfficials_AER.do and LocalOfficials_AER.dta. To replicate the tables and the figures in the paper, run the do file LocalOfficials_AER.do from within Stata. The file “LocalOfficials_AER.dta” contains the data used in this study. Each observation corresponds to a different village of Indonesia. This dataset has been constructed by merging the following data:

- PODES 1996, 2000, 2003 waves
- SUSENAS 1996 wave
- District-level electoral results, 1999 election (from KPU)
- District-level electoral results, 1971 election (from Dwight King)
- District-mayor dataset (from Emmanuel Skoufias)

The PODES datasets are merged based on exact matches of name of the district and name of the village. The SUSENAS dataset was merged with PODES dataset based on village-level code identifiers provided by BPS for the year 1996. The rest of datasets were merged based on names of districts. The final dataset consists on a village-level dataset restricted to observations that match across the three PODES waves. I exclude from the sample districts with fewer than 5 kelurahan or fewer than 5 desa. See section 10.3 in the Online Appendix for further details.

The variable labels describe the content of each variable. See also Table 1 and the notes in Table 5 in the paper for further detail in each of the variables.

Please, note that Figure 1 in the paper has been computed with Excel using as input the point estimates obtained from Appendix Table 12. The do file included in this directory contains the code necessary to reproduce Appendix Table 12. Then, Figure 1 is obtained by adding up the coefficients on “Golkar wins” and “Golkar wins * New Mayor” produced in Appendix Table 12. See the paper for more details.
